Report

Which products in inventory that are below their reorder point? Include the vendor names that supply each product if not made in house.

Ran a command, used a tool >

This is a large dataset. Let me parse and deduplicate it to present it cleanly.

Ran 4 commands >

Here's a summary of the **419 unique products** currently below their reorder point, organized by urgency:

 Zero Stock — Needs Immediate Reorder

Product	Vendor
Women's Tights, M	Fitness Association
Half-Finger Gloves, M	Team Athletic Co.
Hitch Rack - 4-Bike	Green Lake Bike Company
Short-Sleeve Classic Jersey, M	Integrated Sport Products

All four have a reorder point of 3 and are completely out.

 Most Critical Active Products (lowest % of reorder point)

Product	Stock vs ROP	Vendors
Paint - Silver	4 / 45 (9%)	Carlson Specialties, Trey Research

Product	Stock vs ROP	Vendors
Reflector	121 / 750 (16%)	Chicago Rent-All
Hex Nut 11	140 / 750 (19%)	Cruger Bike Company, Norstan Bike Hut
Hex Nut 20	140 / 750 (19%)	Cruger Bike Company, Norstan Bike Hut
Hex Nut 21	144 / 750 (19%)	Cruger Bike Company, Norstan Bike Hut
ML Mountain Seat/Saddle	72 / 375 (19%)	Chicago City Saddles, First Rate Bicycles
Thin-Jam Hex Nut 14	155 / 750 (21%)	Advanced Bicycles, WestAmerica Bicycle Co.
Internal Lock Washer 3	156 / 750 (21%)	Aurora Bike Center, Pro Sport Industries
LL Mountain Frame - Silver, 40	81 / 375 (22%)	In-house
ML Touring Seat/Saddle	83 / 375 (22%)	Chicago City Saddles, Expert Bike Co
HL Mountain Frame - Silver, 38	91 / 375 (24%)	In-house
Lower Head Race	187 / 750 (25%)	International
ML Mountain Frame - Black, 38	96 / 375 (26%)	In-house
Metal Plate 3 / Sheet 7 / Plate 2	~196-198 / 750 (26%)	Custom Frames, Inc.

 Full Picture

- **4 products** at zero stock
- **343 active products** below their reorder point with some quantity on hand
- **72 products** with no inventory records at all (mostly frame variants — likely discontinued or not yet stocked)

The paint, hardware nuts, seats/saddles, and in-house frame components are the most urgent non-zero items. Would you like me to drill into any specific category or vendor?

give top 10 customers with the most purchases

Used 5 tools >

Here are the top 10 customers by total purchase value:

Rank	Customer	Orders	Total Value
1	Brakes and Gears	12	\$989,184
2	Excellent Riding Supplies	12	\$961,676
3	Vigorous Exercise Company	12	\$954,022
4	Totes & Baskets Company	12	\$919,802
5	Retail Mall	12	\$901,347
6	Corner Bicycle Supply	12	\$887,090
7	Outdoor Equipment Store	8	\$841,867
8	Thorough Parts and Repair Services	12	\$834,476
9	Health Spa, Limited	12	\$824,332
10	Fitness Toy Store	12	\$820,384

All top 10 are business/store accounts. Worth noting that **Outdoor Equipment Store** (rank 7) achieved \$841K with only 8 orders compared to the 12 orders most others placed — the highest average order value in this group at roughly \$105K per order. **Brakes and Gears** leads overall at just under \$1M in total purchases.

which customer have the most discounts

Ask_inventory_question >

Here are the **top 10 customers by total discount value received:**

Rank	Customer	Total Discount	Discounted Items	Orders
1	Raul Casts	\$18,970	41	4
2	Reuben D'sa	\$18,239	52	8
3	Steven Brown	\$17,610	13	3
4	Brenda Diaz	\$11,852	8	1
5	Robertson Lee	\$10,682	22	3
6	Teresa Atkinson	\$10,660	8	1
7	Carlton Carlisle	\$10,420	14	1
8	Frank Martínez	\$10,388	17	4
9	Cheryl Herring	\$10,081	17	7
10	Mari Caldwell	\$9,852	17	3

A few things worth noting:

- **Raul Casts and Steven Brown** got outsized discounts relative to their order count — Raul averaged ~\$4,743 in discounts per order, and Steven averaged ~\$5,870. That's notably high compared to most.
- **Brenda Diaz and Teresa Atkinson** each got large discounts from a single order (\$11,852 and \$10,660 respectively), suggesting those were very high-value single transactions with significant promotions applied.
- **Reuben D'sa** had the most discounted line items (52) across 8 orders, indicating consistent application of discounts over time rather than one big event.

how much discounts did Brakes and Gears get

Ask_inventory_question >

Brakes and Gears received **\$5,169 in total discounts** across their 12 orders, spread across 298 line items.

That's a relatively modest discount amount given they're the #1 customer by total purchase value (\$989K). Their average discount per order works out to about \$431, suggesting they primarily drive volume through high-value purchases rather than negotiated discounts. For context, individual customers like Raul Casts (\$18,970) and Steven Brown (\$17,610) received far more in discounts despite spending a fraction of what Brakes and Gears spent overall.

how about Excellent Riding Supplies?

Ask_inventory_question >

Excellent Riding Supplies received essentially **\$0 in discounts** — just \$1.46 total across their 12 orders and 366 line items. That's virtually nothing, likely a rounding artifact or a single tiny promotional discount on one item.

So despite being the #2 customer by total spend (\$961K), they're paying close to full price on everything. Compared to Brakes and Gears (\$5,169 in discounts on similar volume), Excellent Riding Supplies is actually the more profitable account from a margin standpoint.

which products have highest discount prices.

Ask_inventory_question >

Here are the **top 15 products by total discount value**:

Rank	Product	Avg Discount %	Total Discount	Qty Sold	Orders
1	Touring-1000 Yellow, 60	18%	\$60,527	398	79
2	Touring-1000 Yellow, 46	19%	\$50,654	295	73
3	Touring-1000 Yellow, 50	20%	\$27,274	143	51

Rank	Product	Avg Discount %	Total Discount	Qty Sold	Orders
4	Road-650 Red, 44	24%	\$24,640	565	80
5	Mountain-100 Black, 38	30%	\$22,081	106	20
6	Mountain-100 Silver, 38	35%	\$19,337	65	19
7	Mountain-100 Black, 42	33%	\$18,188	72	19
8	Mountain-100 Black, 44	31%	\$18,029	81	16
9	Mountain-100 Black, 48	35%	\$18,014	61	20
10	Mountain-100 Silver, 42	33%	\$16,320	67	17
11	Mountain-100 Silver, 44	32%	\$15,524	73	21
12	Touring-1000 Yellow, 54	20%	\$14,686	77	39
13	Road-350-W Yellow, 48	3%	\$13,452	364	25
14	Touring-3000 Blue, 50	15%	\$12,594	280	70
15	Touring-3000 Yellow, 62	15%	\$12,219	272	72

A couple of notable patterns:

- **Touring-1000 Yellow** variants dominate the top spots — they carry deep, consistent discounts (18–20%) and move a lot of volume, making them the biggest discount drivers overall.
- **Mountain-100** variants stand out for their *aggressive* discount rates — up to **35% off** — even though they sell in smaller quantities. These are clearly being heavily promoted, possibly to move aging stock.
- **Road-350-W Yellow, 48** is interesting at rank 13: only a 3% average discount, but it generates \$13K in total discounts purely because of high sales volume (364 units across 25 orders).

what is Touring-1000 Yellow, 60? give me product details

Ask_inventory_question >

Here are the full details for **Touring-1000 Yellow, 60**:

Identity

- **Product ID:** 957
- **Product Number:** BK-T79Y-60
- **Category:** Bikes → Touring Bikes

Specs

- **Color:** Yellow
- **Size:** 60
- **Weight:** 25.9 lbs
- **Product Line:** T (Touring)
- **Class:** H (High-end)
- **Style:** U (Unisex)

Pricing

- **List Price:** \$2,384.07
- **Standard Cost:** \$1,481.94
- **Gross Margin:** ~\$902 (38% margin at full price)

Availability

- **On Sale Since:** May 30, 2013
- **End of Sale / Discontinued:** Still active

So this is a premium, unisex touring bike — the high-end flagship of the touring line. At a \$2,384 list price, the ~18–20% average discount being applied amounts to roughly **\$430–\$475 off per unit**, which explains why it tops the discount chart so decisively. With 398 units sold across 79 orders at those discounts, it's worth examining whether the promotions on this product are intentional strategy or eroding margin unnecessarily.

give description about Brakes and Gears company

Ask_inventory_question >

Here's a full profile of **Brakes and Gears**:

Company Overview

- **Business Entity ID:** 1032
- **Type:** Brick & Mortar (BM) retail store
- **Specialty:** Mountain bikes
- **Year Established:** 1988 — a well-established shop with over 35 years in business
- **Brands Carried:** Adventure Works (AW) exclusively

Financials

- **Annual Sales:** \$800,000
- **Annual Revenue:** \$80,000
- **Assigned Sales Rep ID:** 276

Operations

- **Store Size:** 18,000 sq ft
- **Employees:** 12
- **Banking:** United Security
- **Internet:** DSL

Contact & Location

- **Address:** 9927 N. Main St., Tooele, Utah 84074
- **Address Type:** Main Office
- No phone number or email on record

Notable Context Brakes and Gears is the #1 customer by total purchase value (~\$989K across 12 orders), specializing in mountain bikes, which aligns well with the Mountain-100 series that sees heavy discounting. They're an exclusive AW brand carrier operating out of a sizeable 18,000 sq ft storefront — a meaningful retail partner. Despite their top-customer status, they received only \$5,169 in discounts, suggesting they buy at close to full price on most transactions.

Used 3 tools >

Here's a comprehensive picture of **Brakes and Gears** based on their full purchase history:

 Ordering Patterns

All 12 orders are offline (sales rep managed), placed on a **quarterly cadence** — consistently at the end of March, June, September, and December. They've been an active customer from **July 2011 through March 2014**. Order size has grown significantly over time:

Period	Order Value
Jul 2011 (first order)	\$23,130
Mid-2012	\$75K-\$87K range
Mid-2013 onward	\$87K-\$124K range
Last order (Mar 2014)	\$105,416

Their **largest single order** was \$124,249 in Sep 2013 — nearly 5× their first order. This is a customer in clear growth mode.

 Product Focus — 100% Mountain

Every single product they buy is mountain-related. Their basket breaks down into a clear hierarchy:

Core revenue drivers (bikes):

- **Mountain-200** series (Black & Silver, sizes 38-46) — their bread and butter, accounting for ~\$434K in revenue across 8 orders each. They buy every size and colorway consistently.
- **Mountain-100** series — high-end units, bought in smaller quantities but still regularly
- **Mountain-300 & 400-W** — mid-tier, reordered quarterly

- **Mountain-500** — entry-level, high volume across all sizes

Frames & components — they also buy HL/ML Mountain Frames and wheels, suggesting they may do some assembly or custom builds in-store.

Accessories — Women's Mountain Shorts, Full-Finger Gloves, helmets, handlebars, pedals, socks, jerseys. Small dollar amounts but bought consistently, rounding out their store inventory.

Key Insights

1. **Pure mountain specialist.** Not a single road, touring, or hybrid product in 81 SKUs purchased. Their store survey confirmed "Mountain" as specialty — their buying behavior is perfectly aligned.
2. **Growing account.** Spend nearly quadrupled from first order to peak. The trajectory from 2011–2014 suggests strong business growth on their end.
3. **Full-line mountain buyer.** They carry the entire mountain bike range — entry (Mountain-500), mid (Mountain-300/400), performance (Mountain-200), and premium (Mountain-100) — across all sizes and colorways. This is a serious, well-stocked mountain bike retailer.
4. **Low discount dependency.** Despite being the top revenue account, they received only \$5,169 in total discounts — they're buying at near full price, making them highly profitable to serve.
5. **Loyal and exclusive.** They carry only AW brands and have been ordering like clockwork every quarter for nearly 3 years. This is a flagship account worth protecting.

based on purchase history, give a suggestion for Brakes and Gears to maximize discounts in the future.

Based on everything we already know from their purchase history, I can provide solid suggestions without needing additional queries.

Suggestions for Brakes and Gears to Maximize Discounts

1. Leverage Volume Thresholds on Mountain-200 (Their #1 Product)

Mountain-200 variants (Black & Silver, sizes 38-46) account for roughly **\$434K** of their spend — nearly half their total purchases. They buy every size and colorway across 8 of 12 orders. If there are volume-based discount tiers, consolidating Mountain-200 orders or slightly increasing order quantities per cycle could push them into higher discount brackets. Even a 5% discount on this category alone would save them ~\$21K annually.

2. Shift to Bundled Orders Instead of Quarterly Singles

Right now they order quarterly but treat each order as a standalone transaction. If the business offers **bundle discounts** (e.g., buy bikes + components + accessories together), they're well-positioned — they already buy all three categories. Structuring a single larger quarterly order that formally bundles their Mountain-500/300/200 bikes with frames, wheels, and apparel could unlock promotional pricing they're currently leaving on the table.

3. Request a Mountain Specialty Account Tier

They are a pure mountain specialist, carry only AW brands, and have been a loyal quarterly buyer for 3+ years with a growing spend trajectory. These are exactly the criteria that justify requesting **preferred partner or specialty account status**, which typically comes with structured discounts (5-15%) and early access to promotions. Their exclusivity to AW brands is a strong negotiating point.

4. Time Large Orders Around Seasonal Promotions

Their orders land at end-of-quarter (March, June, September, December) — which often aligns with sales pushes to hit revenue targets. Coordinating their largest orders (historically Q2 and Q3 when they spend \$87K-\$124K) with any end-of-quarter promotions or clearance cycles could yield meaningful discounts, especially on Mountain-100 units which already see up to **35% off** in the discount data.

5. Add Mountain-100 to Their Regular Rotation

Mountain-100 is the product line with the steepest discounts in the entire catalog (30-35% avg), yet Brakes and Gears only buys it sporadically in small quantities. Given their

premium mountain positioning and 18,000 sq ft store, increasing their Mountain-100 commitment — especially if it comes with promotional incentives — could deliver substantial savings while filling a natural gap in their high-end inventory.

6. Negotiate a Freight Discount

Their freight costs run consistently around **3% of subtotal** (~\$2,000–\$3,400 per order). Across 12 orders they've paid roughly **\$27K in freight**. As a high-volume, repeat buyer, negotiating a flat freight rate or free freight above a certain order threshold is a straightforward ask that would effectively function as a discount without requiring changes to product pricing.

Summary Table

Opportunity	Estimated Potential
Volume tier on Mountain-200	~\$21K/year at 5%
Bundle pricing across categories	Moderate — depends on program
Specialty/preferred account status	5-15% across the board
Timing orders with seasonal promos	Particularly on Mountain-100
Increase Mountain-100 commitment	30-35% discount available
Freight negotiation	~\$5-9K/year savings

Given their loyalty, exclusivity, and growth trajectory, Brakes and Gears has strong leverage to negotiate — they just haven't been using it.

give me chart visualization showing customer purchasing trend in the past 1 year?

Ask_inventory_question >

 Log in to see interactive visuals

A few things the trend line makes clear:

The first order in Jul 2011 was a small trial at \$20.5K, followed by a sharp jump to ~\$67K by Oct 2011 as they committed to the relationship. Through 2012 they settled into a consistent \$66K-\$77K range — reliable but flat. Then in mid-2013 something changed: two consecutive orders hit \$107K and \$110K, their biggest ever, likely driven by strong summer/fall mountain bike demand. Even after that peak, their Dec 2013 and Mar 2014 orders (\$87K and \$93K) remained well above their 2012 baseline, suggesting the business genuinely grew — not just a one-off spike. The dashed trend line confirms steady upward momentum across the entire relationship.

is there a customer that received discount different from special offer rules

Ran 3 commands, used a tool >

There are **2,151 line items** across **2,015 customers** where the discount applied doesn't match the special offer rules. Here's the breakdown:
